TABLE OF CONTENTS

In the Fall of 1972, the University of Maryland School of Nursing implemented a new curriculum designed to educate baccalaureate students using a holistic approach to the study of man. The curriculum approach was the incorporation of cultural, physical, and psychological, as well as biological, aspects of man as the basis for nursing education. The development of a conceptual framework was used to facilitate the study of man, his needs, and the nurses' role in promoting care.

The feedback loop of 1973-74 leads when it is appropriate to utilize this conceptual framework in future years and the class of 1974 is the first to complete this project.

The environment created for living and learning is defined as INPUTS into the student which are provided by the academic staff, faculty, and staff. OUTPUTS of the student system are described as the student's behavior as generated in relation to the nursing process. The nursing process is described as a continuing, open-ended, up-to-date process from less to more complex. The student system is described as a system that achieves and/or maintains dynamic equilibrium and maintains a high level of functioning and provides some satisfaction. The academic staff is described as a subsystem of the student system. The NURSING PROCESS, the nursing process, is described as the nursing process for providing care.

STUDENT NURSES' ASSOCIATION OF MARYLAND

The Student Nurses' Association of Maryland functions to introduce students to the responsibilities of nurses as professionals, within the community. Emphasis is placed on legislation concerning health care, nurse practice legislation and current issues related to health care. By creating an awareness of these issues early, SNAM members hope to enhance their participation in the delivery of health care, and the profession of nursing.

DISTRICT OF COLUMBIA STUDENT NURSES' ASSOCIATION

D.C.S.N.A. is the district's division of the National Student Nurse's Association, made up of students enrolled in schools of nursing within the boundaries of the District of Columbia. DCSNA attempts to promote active involvement with the concerns facing the nursing profession today. It addresses itself through discussion and activity to such issues as the changing role of nursing in the health care system, the nurse as collaborator with other health professionals, and the development of nursing awareness of community needs. Such attention is directed toward the personal and professional growth of the student with an increasing awareness and acceptance of her responsibility to herself, her profession, and her society.
